Re: Support for Fast Channel Change IIF-ARCH-2008-050; Fast Channel Change Presentation IIF-ARCH-2008-051; and Content Acquisition Latency Issue Proposal IIF-ARCH-2008-148

Dear Mr. Goode:

Consistent with the Operating Procedures for ATIS Forums and Committees section 10.4, this is to advise you that Microsoft believes it may have patent rights (in the form of patent(s) and/or pending application(s)) the use of which would be required for compliance with the proposed Support for Fast Channel Change IIF-ARCH-2008-050; Fast Channel Change Presentation IIF-ARCH-2008-051; and Content Acquisition Latency Issue Proposal IIF-ARCH-2008-148.

If any claims of any issued Microsoft patent are required for compliance with the Support for Fast Channel Change IIF-ARCH-2008-050; Fast Channel Change Presentation IIF-ARCH-2008-051; or Content Acquisition Latency Issue Proposal IIF-ARCH-2008-148 as formally approved by ATIS, Microsoft will make a license to such patents available to applicants under reasonable terms and conditions that are demonstrably free of any unfair competition in accordance with the Operating Procedures for ATIS Forums and Committees.

For any questions or further information, please contact: [stdsreq@microsoft.com](mailto:stdsreq@microsoft.com)

Sincerely,

Microsoft Corporation
